klflory@topeka.org*

**Enroll by August 2, 2021**

**at [www.taskforce1.net](http://www.taskforce1.net)**

**\$150 per student!**

Engine company operations in a high rise or in any super-sized structure is much different than working a fire in a single family dwelling 150' from the engine!

There are a lot more moving parts in this event.

Longer stretches, extended time to reach the fire floor, hose line management challenges and an understanding of fire protection systems are all part of the equation.

We will share some best practices that will make your engine company perform well at one of these incidents.

**Instructor:** Assistant Chief Mike Prete, (ret.)  
Montgomery County (MD) Fire Rescue
